The idea of the camp is to give ambitious juniors the best possible opportunity to improve their game. We will be using experts in their relevant fields to ensure the very best quality of delivery at grass roots level. According to our research it is vital to give players the correct information at the earliest possible stage.

The players will have the opportunity to play with former **Ryder Cup Player Paul Broadhurst**. With more than 500 participations in tournaments he is one of the most experienced players on the European Tour. Amongst others, he played at the World Cup as well as the Four Tours World Championship. He was awarded the **Sir Henry Cotton Rookie of the Year Award** as best newcomer, as once were also **Thomas Bjorn, Sergio Garcia, Martin Kaymer etc.** Paul Broadhurst is still playing on the European Tour.

The players will have the excellent opportunity to ask as many questions as possible to find out how they can improve i.e. how to practice, how to prepare for tournaments, how to schedule, how to structure practice and they can find out about life on tour.

Another highlight is, that we could enrol the most qualified and successful sports psychologist in the world.

Dr. John Pates, SGPL, has been involved in performance coaching and education for the past 20 years. He worked successfully on the European PGA tour and with over 50 tour professionals - including seven Ryder Cup players.

John Pates will establish a profile of the players and he offers his help to develop their own way to perform under pressure. Each player will receive a free skills book, will learn how to set goals and how to develop a performance plan. He will follow the groups on the course, will provide assistance and advice and analyze the mental state of the players during the round.

The players' swings will be also evaluated using Sports Science. They will be tested using 3D Biomechanics / Biofeedback Analysis from Golfbiodynamics and Prof. Rob Neal. The system will be run by **Garry Malia** from **SGPL**.

The players will test their distance with each club and evaluate their distance control with Trackman that is used by both the European Tour and the US PGA Tour. This system will be run by **Paul Dougan** from **SGPL**.
